[Redacted] Chief
Okinawa Bureau, FBIS

25X1

Dear Jim:

Subj: Word Processing System

Enclosed is a data sheet on the Wang 7520T Word Processing System, which appears to be the best system to meet the in-house needs of Okinawa Bureau. As you may recall, the Agency earlier this year decided to standardize on Wang. The 7520T appears capable of handling all the requirements of a large field bureau.

Please have a look at the data sheet and let me have your comments. Service for the Wang may present a problem on Okinawa. Our understanding is that the nearest service representative is in Tokyo, but that Tokyo service would be available. Please check on this and let us know.

If we determine that a Wang would be impractical on Okinawa, we should be able to get Agency approval to use another system. We would need the strongest justification and would obviously prefer to stay with Wang if possible.

We are hoping to use FY-82 year-end funds for the purchase and would like your response as soon as possible. An admin message indicating whether or not the 7520T will do would suffice.

Sincerely,

[Redacted]
Chief, Operations Group
